when I installed the mod, there are no propeller noises and no rare noises of parts of the plane

it didn't happen. Also i install the mode main game data folder. Please help me.

-Included in the pack are AirplanePlus and Firespitter\* folders. It also packs ModuleManager\*

\*I do not own these mods, I merely packed them in for Airplane Plus to be functional and avoid linking for downloads of

Also, what do you mean by the 'root folder'?

kbvnhld ▼

nuclearkerbal -

grande1901 ▼

Yes, It does. Most 1.8 mods work with 1.9.

carl\_pants\_885 ▼

yes, 1.9 is almost only a visual mod

I cant find any new cockpits plz help

der\_\_player ▼

ShackTi1 ▼

In reply to deadfrot123: I too have this issue.

this

or wings or anything i only have engines

I have the same problem

In reply to arbizy:

It's not working on 1.8.1

Can somebody pls help me.

kbvnhld ▼

Note: I tried moving it to the GameData folder and the root folder, but neither worked. I also tried updating (downdating?) KSP to 1.8.1 from 1.9.1 and that did nothing. Last edited by kbvnhld: Apr 11, 2020

I only got the Mk3 Cargo Cockpit, anti-roll landing skids and the propeller engines. The engine sounds have also

arbizy 🔻 does this work for 1.9.1? Report Reply

I also see missing textures on some parts. The texture in the parts' folders is just "placeholder.dds"

I only got the engines, anti roll landing skids and the mk3 cargo cockpit

In reply to deadfrot123: Most likely another Mod. MechJeb has that problem. If you have MechJeb installed, try removing it and loading KSP again. Quote Report Reply Multi-quote

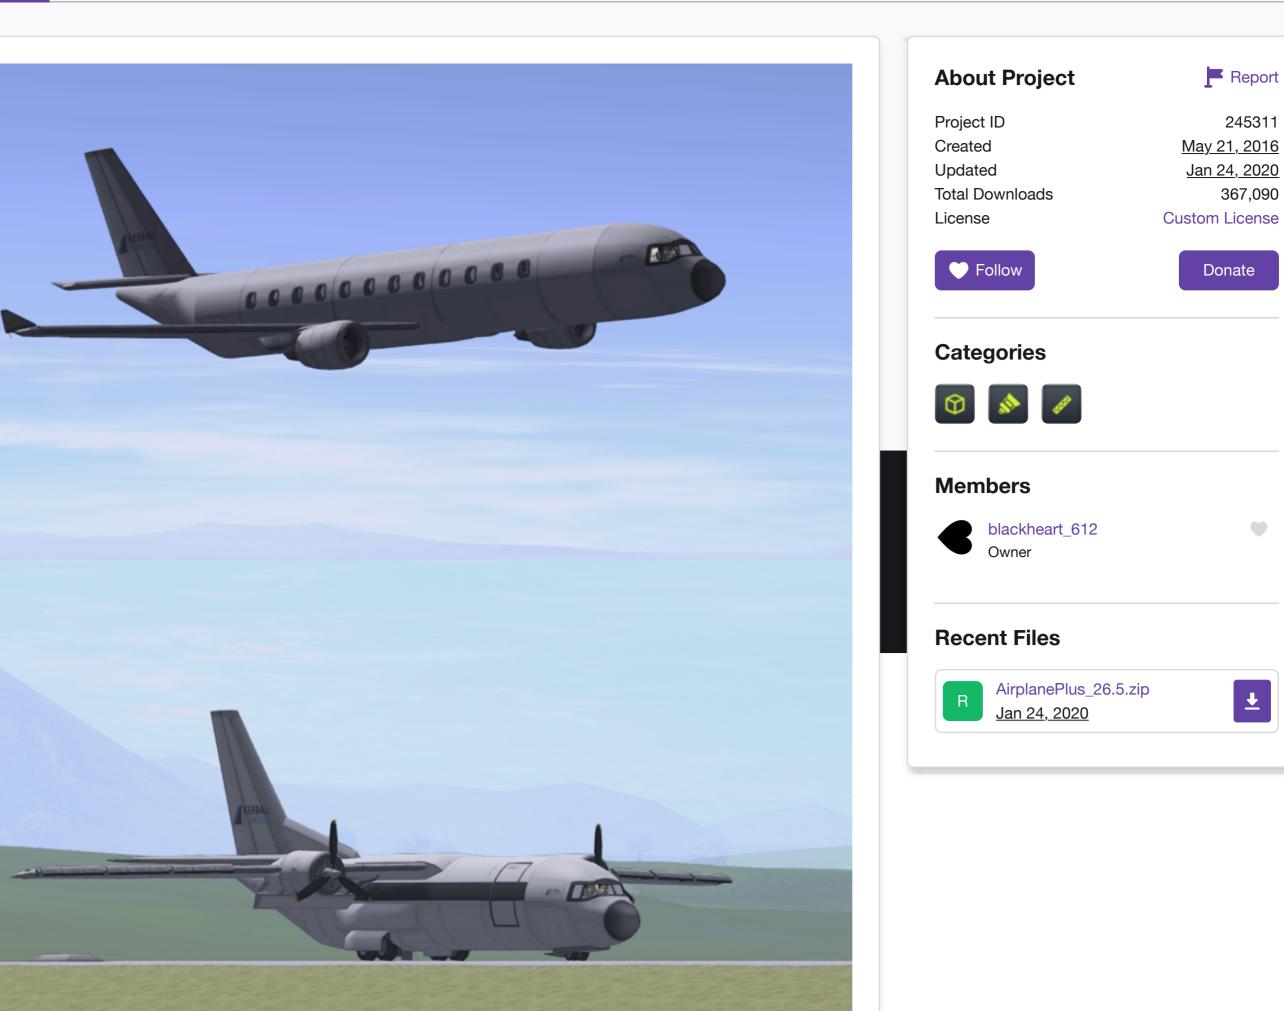

mean it loads alll the way in but then it get stuck on verifying expansions: breaking ground Serenity... please please fix

plutonium4 ▼ Can you please fix the glitch for 1.8? it loads all my mods perfectly.... but once I get THIS MOD... it suddenly .. fails... I mean it loads all the way in but then it get stuck on verifying expansions: breaking ground Serenity... please please fix this

I've found that it's "Firespitter" that stops KSP from loading. Removing "Firespitter" lets the game load, but some of the parts don't work. Hopefully this issue gets resolved.
